Profile

Versatile and focused individual with strong foundation in cybersecurity, UI/UX Design and WebApp applications with a passion for creating secure, user-centric digital experiences. Skilled in identifying security risk while designing intuitive interfaces that enhance usability and trust as well as spark in front-end development. I combine my knowledge of cybersecurity and UI/UX design to create digital experiences that are both secure and user friendly.

Projects

Web application

Anima

- Secure authentication website using pHP, mysql, xampp and javascript.
- CRUD function included.

Mindnest

- Developed a prototype for this project.
- Developed secure authentication.
- Database handle using mysql and xampp.

Wifi cracking

- Used python bash script in linux to crack the password.
- Linux-based bash codes

Mobile application programming

- Designed UI/UX for the application.
- Helped in front-end development
- VAPT testing using MobSF with Docker.

RealEstate WebApp

- Designed for an organization using php,HTML, Css and firebase.
- Crud functions with best UI features.

Academic

Taylors university | Malaysia

Bachelors in Computer Science | March 2022 - Present

Courses

- Web application development
- Ideating startup
- Designing
- Cyber security
- Wireless network
- Mobile computing
- Data visualization

D.A.V College | Jawalakhel

+2 Computer Science | 2019 - 2021

- Graduated by developing skills in computer language.
- Passed out with a CGPA of 3.2.

Skills

- UI/UX Designing
- Penetration Testing(VAPT)
- Front-end Development
- Backend Development
- Cyber security basics
- Linux basics
- Adaptability & Flexibility
